SUSTAINABILITY AND ENVIRONMENT, M.S.

With a focus on the interconnectedness of social equity, the environment, the economy, and aesthetics, the customizable M.S. in Sustainability and Environment is designed for professionals pursuing sustainability in any field. The program is intended for students interested in sustainability-related careers in governmental and non-governmental organizations and the private sector, as well as professionals already working in sustainability or related fields. Additionally, the M.S. provides a launching pad for students seeking doctoral or advanced professional degrees. Students in the program develop skills in critical and systems thinking, problem-solving, communication, and navigating relevant research. Specifically, students are trained in identifying problems and potential solutions; analyzing quantitative data and scientific literature; developing research/business proposals; and effectively communicating through oral, written, and online multimedia formats.

The degree requires 36 credit hours, of which 18 are required core courses (all offered asynchronously online) and 18 are electives chosen in consultation with the advisor. Nine of the elective credits must be interdisciplinary and come from outside the Department of Geography, Environment, and Sustainability (GES). The other nine credits of electives must be from inside GES, including the required final project (either an internship, capstone, or thesis). The M.S. is designed so that it can be completed entirely online; electives may be taken either online or face-to-face. More information is available at https://ges.uncg.edu/msse/.

For information regarding deadlines and requirements for admission, please see https://grs.uncg.edu/programs/.

In addition to the application materials required by the Graduate School, applicants must submit:

- A resume/C.V.
- A personal statement summarizing student's background and interests.
- Two letters of recommendation.
- Official undergraduate transcripts.

Applicants are required to have a bachelor’s degree from an accredited college or university or appropriately evaluated credentials for non-U.S. schools. An undergraduate minimum GPA of 3.0 is preferred.

GRE scores are optional.

For further information, consult the M.S. in Sustainability and Environment Prospective Student (https://ges.uncg.edu/evs/msse/prospective-student-faq)/FAQ.
