Ratnasingham Shivaji, Head of Department
Dan Yasaki, Associate Head of Department
Maya Chhetri, Director of Graduate Study
Sebastian Pauli, Director of Undergraduate Studies

Mission Statement
The mission of the Department of Mathematics and Statistics at the University of North Carolina at Greensboro is to provide intellectual leadership in the mathematical sciences that is of direct benefit to the State of North Carolina and that commands national and international respect for the quality of its educational programs and for its depth of scholarship.

Undergraduate
The Department of Mathematics and Statistics offers undergraduate programs leading to the B.A. and B.S. degrees in Mathematics, as well as a minor in Mathematics and a minor in Statistics. The goal of all of the department’s programs is to produce students who are both technically competent and sufficiently well grounded in theory that they can contribute to fundamental research in their chosen specialty.

To give a professional direction to the student’s liberal arts education, the mathematics major may choose a concentration in statistics or high school teaching licensure. There are many opportunities for math majors in industry, actuarial sciences, government, business, and secondary school teaching. The mathematics programs also provide excellent preparation for graduate studies in many areas, including computer science, economics, engineering, law, mathematics, operations research, and statistics.

Graduate Study Preparation
Students planning to pursue graduate study should contact their advisor as soon as possible to prepare a plan of study.

Graduate
The department offers a variety of outstanding graduate programs. Our faculty and staff serve nearly 4,000 students every year. The faculty consists of nationally and internationally recognized researchers in diverse areas of mathematics, statistics, and mathematics education. They are also outstanding professionals committed to teaching excellence, and they take great pride in guiding our students to enjoy the beauty of mathematics.

The department has also been hosting various professional conferences and special events, lecture series, colloquia, and seminars. These activities have greatly enhanced our students’ learning experience at UNC Greensboro. Most of our graduate students are supported via attractive graduate assistantships.

Qualifications

• 3.30 or greater cumulative GPA at graduation
• A grade of B or higher in all course work used to satisfy the Honors requirement in Mathematics
• A declared Mathematics major

Recognition

The designation “Completed Disciplinary Honors in Mathematics” and the title of the Senior Honors Project will be printed on the student’s academic transcript.

Honors Advisor

See Dr. Richard Fabiano, Honors Liaison, for further information and guidance about Honors in Mathematics.
