PSYCHOLOGY, B.S.

The Psychology Major provides a background for entry into a variety of professions other than psychology where understanding the principles of behavior and cognition is important. It also provides the necessary background for individuals planning to do graduate work in either basic or applied psychology.

The curriculum provides students with a structured, sequenced exposure to six core areas in psychology. These are: behavior analysis; biopsychology; clinical psychology; cognitive psychology; development psychology; and, social psychology. Majors must sample from at least four domains at the intermediate (200) level, but can choose a narrower or broader sampling of upper level courses. The curriculum also affords hands-on experience with scientific psychology via laboratory courses and field experiences.

The Psychology Major for the Bachelor of Science degree serves students who want additional training in science, math, statistics, and research methods relative to the Bachelor of Arts degree.

Overall Requirements
- 120 credit hours, to include at least 36 credits at or above the 300 course level
- Minimum 44 credits in psychology
- Students must earn a grade of at least C- in all psychology courses required for the major.

Degree Program Requirements

University Requirements

General Education Requirements (MAC)

College of Arts and Sciences Additional Requirements (CIC)
