PSYCHOLOGY, M.A./PH.D.

Clinical Psychology Concentration

Clinical students in the M.A./Ph.D. track are required to satisfy all requirements for the M.A. degree in clinical psychology as well as all requirements for the Ph.D. degree. A minimum of 45 credit hours is required for the M.A. The Ph.D. in Clinical Psychology requires 105 credit hours including internship hours (2 credits). All credits earned to satisfy the M.A. degree may be applied toward the Ph.D. degree requirements.

Students who receive an M.A. in Clinical Psychology from another institution must submit syllabi, thesis document, and other materials for review. The students will work closely with their advisor and the Director of Clinical Training to develop their doctoral plan of study. All courses taken at another institution are reviewed for course equivalence with our required courses. If deemed equivalent, the course requirement is waived. In addition, the thesis is reviewed by a committee of three faculty, and, if viewed as comparable in scope and theoretical focus to the UNC Greensboro thesis requirement, no additional thesis work will be required.

For information regarding deadlines and requirements for admission, please see the Guide to Graduate Admissions.

Researchers of the department do not accept students who seek a terminal M.A. degree in Clinical Psychology, only those seeking a Ph.D.

For clinical program students, course grades lower than a B cannot count toward either the M.A. degree or the Ph.D. degree; these courses must be re-taken, or substitute courses taken. Course equivalents are decided according to departmental policy, which varies by course category (e.g. tools courses vs. clinical courses).

M.A. Degree Program Requirements

Required: 45 credit hours

</table>
Specific courses fulfilling this requirement are individually planned for each student in consultation with the doctoral planning committee and are determined in part by the student's pre-matriculation competencies and research and career goals. Courses offered at sister institutions may also fulfill this requirement as deemed by the planning committee.

Or another quantitative course approved by the doctoral planning committee.

Four credits minimum must be completed post-M.A., one credit in each of four semesters.

In addition to the credits earned for the M.A.

One credit in each of two semesters.

### Discipline Specific Knowledge (Basic and Advanced integrative)

Coverage of basic knowledge in 5 core areas of Psychology (Biological, Developmental, Social, Cognitive, and Affective) and advanced integration of this knowledge across at least two of these areas is evaluated and met through a variety of ways including: 1) formal graduate level coursework which builds on a student's pre-matriculation experiences and competencies, 2) laboratory based research, including the thesis and dissertation, and 3) preliminary examination paper and oral defense. In some cases, pre-matriculation competencies may fulfill the basic foundational requirement for one or more areas. Regardless of the specific way in which a student meets these requirements outside of formal coursework, a minimum of 2 graduate-level courses are required to complete this requirement.

Students select from a menu of courses, based on their pre-matriculation experiences and in consultation with the planning committee. At least 2 courses, each incorporating at least 2 of the basic core areas and including integration across the area, are required. In choosing from an array of courses, coverage of at least 4 different core areas must be attained. Students will obtain foundational coverage in the fifth basic area through other educational means (e.g., thesis prelim or dissertation, pre-matriculation competencies with graduate-level evaluation, etc.). Regardless of means of acquiring advanced integrative knowledge, all educational experiences are evaluated at the graduate level.

Specific courses fulfilling this requirement are individually planned for each student in consultation with the doctoral planning committee and are determined in part by the student's pre-matriculation competencies and research and career goals.

### Additional Quantitative Course/Seminar Requirement for the Ph.D. Degree

Note that a minimum of 3 credits must be in the Quantitative area. If 6 credits are taken in Quantitative, no additional seminar is required. If only 3 credits are taken in the Quantitative area, the student must supplement their coursework with an additional seminar (a PSY 735 course either in clinical or within another area(s) of Psychology, or an outside seminar approved by the doctoral planning committee).
