Mission
The mission of the Department of Management is to support the mission of the Bryan School, primarily through the imparting of knowledge through instructional programs and secondarily through the creation of knowledge through basic and applied research. A third priority is to provide service through involvement in university, professional and community activities.

The Department of Management offers two majors that lead to the Bachelor of Science degree: Business Administration and International Business Studies. The Business Administration major is comprised of three concentrations: Business Studies, Human Resources, and Management.

Business Administration Major
The objective of the Business Administration major is to provide liberally educated students with a broad exposure to the functional areas of business and a more comprehensive understanding of one of the managerial specialties through a choice of a concentration:

- **Business Studies** is most appropriate for those who want a broad business exposure without the need to concentrate specifically in only one functional area. (A student can complete the Business Studies concentration by careful planning of the Career Profile.)

- **Human Resources** focuses on skills and knowledge needed by the professional human resources manager: job analysis, recruiting, screening, selection, training and development, performance appraisal, job evaluation, and salary administration.

- **Management** focuses on courses in the management area with courses in leadership, organizational behavior, human resources, decision-making, cross cultural management, and strategy. The concentration is designed for students that want a more focused education on issues and problems faced by those involved in business management.

International Business Studies Major
The International Business Studies major is distinctive in the Bryan School by requiring experiences and competence in areas such as language and study abroad that are not required in other business programs. The need to understand other cultures, societies, and economies is met by requiring/recommending more in liberal education and related areas than is required in General Education requirements for other business programs.

Business Administration Disciplinary Honors
The Department of Business Administration supports and encourages students to participate in an appropriate Honors Program administered by the Lloyd International Honors College. The Lloyd College espouses that the students who complete the Disciplinary Honors program gain advanced understanding and skills in their major. Further, it is believed that participation in the Honors programs provides students with a competitive edge in applying to a graduate schools and those seeking employment will find that prospective employers view participation in Honors as a good proxy for workers who are capable, well-trained, eager to learn, and intellectually curious.
Ms. Eloise McCain Hassell is the Honors Advisor for the Department. If, after reading this section, you still have questions, please see Ms. Hassell, Room 373, Bryan.
