GERONTOLOGY
UNDERGRADUATE MINOR

The Gerontology minor is designed for undergraduates with any major who are interested in a career in aging or personally interested in the topic. This minor should be of special interest to undergraduates planning to pursue careers in the allied health fields, with businesses or non-profits providing services or products to older adults and their families, or after attending graduate school, as researchers in their respective fields.

Students will learn to locate information relevant to the aging experience and communicate it effectively to others, describe the variety of aging experiences, analyze current opportunities and constraints on how people age, and interpret data and apply theories of aging to gain perspective on their own futures as older adults and to identify areas for change.

Working with the Gerontology Undergraduate Coordinator and their major advisors, students will have an opportunity to complete a program of study customized to help them meet their own career or personal goals. Many of the courses, including GRO 201 Introduction to Gerontology: Thinking about Aging (the only required course), are offered online and, with planning, it is possible to complete the minor entirely online.

Overall Requirements

The Gerontology minor consists of four 3-credit courses, one of which is required (GRO 201) and none of which can count as credit towards the major.

Program Requirements

* Minimum of 12 credit hours

* Chosen from the courses listed or other courses with a focus on aging under advisement from the Gerontology Undergraduate Coordinator.

Note: Some of these courses require prerequisites or permission of the instructor, but it is possible to complete the minor without taking any of those courses.
