**NANOSCIENCE, PH.D.**

The Ph.D. in Nanoscience requires a minimum of 49 credit hours and is designed to prepare students to take positions in industrial, governmental, or academic research settings by providing a solid background in nanoscience theory and experimental techniques through course work and dissertation research. Advanced elective courses in nanoscience areas ensure students will have substantial depth of understanding in their area of interest and enable them to effectively carry out advanced nanoscience research.

For information regarding deadlines and requirements for admission, please see [https://grs.uncg.edu/programs/](https://grs.uncg.edu/programs/).

In addition to the application materials required by the Graduate School, applicants must submit a personal statement indicating their interest in the program and a current curriculum vitae.

Qualified applicants with a B.S. degree in an area related to Nanoscience (physics, chemistry, biology, mathematics, computer science, or engineering) and, as a minimum, completed calculus through differential equations may apply to the Ph.D. program.
