

MUSIC, B.A.

Student Learning Goals

The Bachelor of Arts in Music degree indicates the study of music in a liberal arts degree framework. It emphasizes a broad coverage of music rather than heavy concentration on any single segment. Studies develop musicianship, capabilities in the use of principles and procedures that lead to an intellectual grasp of the art, and the ability to perform. It serves individuals who seek a broad program of general education rather than intense specialization.

Graduating students in the Bachelor of Arts in Music program will:

- Analyze the issues, problems, practices, theories, and contexts of music study within the disciplines of musicology, ethnomusicology, and music theory;
- Clearly articulate a variety of contrasting perspectives;
- Evaluate different source types in music study;
- Apply critical thinking to a multitude of disciplinary perspectives;
- Present and defend (in oral and written form) a thesis driven project.

Overall Requirements

- 120 credit hours, to include at least 36 credits at or above the 300 course level.
